TITLES AND SUBJECTS

Data Processing

Phillips, Cecil R., Fifteen Key Features of Computer Programs for CPM and PERT, January–February, 1964, p. 14.

Decision Theory

Bullinger, Clarence E., Comments on "A Critical Evaluation of the Field of Engineering Economy," November–December, 1964, p. 316.
Radnor, Michael, A Critical Evaluation of the Field of Engineering Economy, May–June, 1964, p. 133.

Design

English, J. Morley, Understanding the Engineering Design Process, November–December, 1964, p. 291.

Dynamic Programming

Liittschwager, John M., Dynamic Programming in the Solution of a Multistage Reliability Problem, July–August, 1964, p. 168.

Economics

Ghare, P. M., and Torgersen, P. E., The Effect of Inflation and Increased Productivity on Machine Replacement, July–August, 1964, p. 201.
Myers, Verne S., The Reversible Relationships between Gross National Product and Research and Development Performed in Industry, January–February, 1964, p. 24.

Engineering Economy

Brennan, J. F., Optimum Life of Fleet Automobiles, November–December, 1964, p. 297.
Bullinger, Clarence E., Comments on "A Critical Evaluation of the Field of Engineering Economy," November–December, 1964, p. 316.
Canada, John R., Capital Budgeting: Its Nature, Present Practice and Needs for the Future, March–April, 1964, p. 82.
Clare, Kenneth G. (Technical Note), Development of Criteria for Deciding Whether to Rebuild or Replace Major Industrial Equipment, March–April, 1964, p. 107.
Dryden, Myles M., How Do Recent Changes in Tax Laws Affect Investment Decisions?, January–February, 1964, p. 9.
Ghare, P. M., and Torgersen, P. E., The Effect of Inflation and Increased Productivity on Machine Replacement, July–August, 1964, p. 201.
Radnor, Michael, A Critical Evaluation of the Field of Engineering Economy, May–June, 1964, p. 133.

Facilities Planning

Battaglin, Robert M., and Prenting, Theodore O., The Precedence Diagram: A Tool for Analysis in Assembly Line Balancing, July–August, 1964, p. 208.
Francis, Richard L. (Technical Note), On the Location of Multiple New Facilities with Respect to Existing Facilities, March–April, 1964, p. 106.
Kase, Shigeo, and Nishiyama, Noriyuki, An Industrial Engineering Game Model for Factory Layout, May–June, 1964, p. 148.
Wilson, Richard C., A Review of Facility Design Models, May–June, 1964, p. 115.

Forecasting

Canada, John R., Capital Budgeting: Its Nature, Present Practice and Needs for the Future, March–April, 1964, p. 82.
Daniels, Everett J., A Long Range Planning Model for a New Firm in a Growth Market, March–April, 1964, p. 100.
Ghare, P. M., and Torgersen, P. E., The Effect of Inflation and Increased Productivity on Machine Replacement, July–August, 1964, p. 201.
Myers, Verne S., The Reversible Relationships between Gross National Product and Research and Development Performed in Industry, January–February, 1964, p. 24.
Reisman, Arnold, Optimal Marketing Strategy via Lagrange's Method of Undetermined Multipliers, July–August, 1964, p. 181.
Roper, Don E., Critical-Path Scheduling, March–April, 1964, p. 51.

Game Theory

Campbell, Forrest, Pierce, Donald, and Torgersen, Paul E., The Maintenance Game, January–February, 1964, p. 30.
Kase, Shigeo, and Nishiyama, Noriyuki, An Industrial Engineering Game Model For Factory Layout, May–June, 1964, p. 148.
Reisman, Arnold, Optimal Marketing Strategy via Lagrange's Method of Undetermined Multipliers, July–August, 1964, p. 181.

Human Factors

Kottler, Julian L., The Learning Curve—A Case History in Its Application, July–August, 1964, p. 176.
Woodson, William S., Creative Techniques—A Comparative Analysis, March–April, 1964, p. 60.

Inventory Control

Carlson, Phillip, On the Distribution of Lead Time Demand, March–April, 1964, p. 87.
Cohen, Gerald D., The Use of Service Rates in Evaluating Inventory Control Systems, March–April, 1964, p. 95.
Freeman, Michael C., The Effects of Breakdowns and Interstage Storage on Production Line Capacity, July–August, 1964, p. 194.
Gross, Donald, and Ray, Jack L., Choosing a Spare Parts Inventory Operating Procedure—Bulk Control versus Item Control, November–December, 1964, p. 310.
Kabus, Irwin (Technical Note), An Application of Order Statistics to Inventory Control, May–June, 1964, p. 151.
Rutenberg, Y. H. (Technical Note), Calculation of Economical Order Quantities Using Ranges of Setup Cost, January–February, 1964, p. 44.

Maintenance

Campbell, Forrest, Pierce, Donald, and Torgersen, Paul E., The Maintenance Game, January–February, 1964, p. 30.
Clare, Kenneth G. (Technical Note), Development of Criteria for Deciding Whether to Rebuild or Replace Major Industrial Equipment, March–April, 1964, p. 107.
Ghare, P. M., and Torgersen, P. E., The Effect of Inflation and Increased Productivity on Machine Replacement, July–August, 1964, p. 201.

Materials Flow and Handling

Battaglin, Robert M., and Prenting, Theodore O., The Precedence Diagram: A Tool for Analysis in Assembly Line Balancing, July–August, 1964, p. 208.
Patterson, Richard L., Markov Processes Occurring in the Theory of Traffic Flow through an N-Stage Stochastic Service System, July–August, 1964, p. 188.

Measurement

Ghare, P. M., and Jones, Ned Gene, Confidence Intervals for Systematic Activity Sampling, May–June, 1964, p. 141.
Parks, George M. (Technical Note), Multiple Criteria Sequential Work Sampling, July–August, 1964, p. 221.
Smalley, Harold E., Comments on "Work Measurement in Perspective—Universal Time Data," January–February, 1964, p. 42.
Stukey, Arthur E., Work Measurement in Perspective—Universal Time Data, January–February, 1964, p. 37.

Methods

Budnick, A. S., Value Engineering—A Form of Industrial Engineering, July–August, 1964, p. 184.

Motivation and Wage Incentives

Bronson, M. E., Incentive Coverage: When and How Much for a Performance Control System?, January–February, 1964, p. 21.
Kottler, Julian L., The Learning Curve—A Case History in Its Application, July–August, 1964, p. 176.

Organization

Anderson, C. William, Industrial Engineering in a Telephone Company, September–October, 1964, p. 228.
Bennington, Paul W., Industrial Engineering Practices at The Steel Company of Canada, Limited, September–October, 1964, p. 232.

WANTED SENIOR STATISTICIAN

Qualifications: Must have PhD in Statistics. 0 to 5 years experience. Should have undergraduate work in chemistry, chemical engineering or other physical science. Related industrial experience may be substituted. Must be oriented to the use of computers.

Duties: Will serve as plant consultant and specialist in applied industrial statistics. Applications are in QC methods, designed experiments for chemical engineering, chemistry and other technology. Will be closely associated with department activities in industrial process and management systems simulation.

The position is in a research and production facility of the Rocky Flats Division of The Dow Chemical Company located approximately fifteen miles northwest of Denver, Colorado.

Please send resume to:
